FORMULA 2022

NEW

NSR FORMULA 22 - THE NEW ERA

After the amazing success of the first NSR Formula (86/89), we worked hard to still improve its successor: **NSR Formula 22**, the new modern era.

A new generic **NSR** model, inspired on the real F1 cars of 2022 year.

NSR Research and Development department and Racing department worked side by side to give life to a new **NSR** Formula made with the pure shapes of the real models, and at the same time being extremely competitive on the track.

Hard work was carried out to design the mechanical parts, on both chassis,

motor support, wheels, etc., to maximize performance and make the car extremely fast on the track.

The setup can even be completely customized using different parts as suspensions or chassis hardness, or adjusting front axle height, motor support attachment points, body height etc.

The model is flexible and resistant to the standard impacts on track.

The driver has also been redesigned with a new detailed and realistic helmet.

All the project was made in full **NSR** style: Fast, accurate and made with the best quality that 100% Made In Italy ensure.

FACTORY

World Champions from 1997

NSR is an Italian artisan Company making professional slotcars 100% here in Italy, into its factory. New factory opened in mid 2010. It displays over 1.100 square meters; it is a building realised with modern techniques in a total respect of health and environment.

It is very comfortable, the walls are totally temperature insulated by aluminium padded panels, all the rooms where fellow workers assemble cars and parts, have controlled temperature by automatic power inverters as well as powerfull aspirators for the welding smoke.

There are photovoltaic panels laid on top of the roof to produce over 100.000 KW/year green power energy to totally satisfy our internal power need.

Inside the NSR factory work only young people, dynamic and motivated, enough to say that the average age it is of 22 years!

NSR makes highly performing model cars, a technological concentration of parts to be competitive straight out of the box.
